

Job Title: Founding Fullstack Engineer (Django + React/React Native)

Company: Cosmium AI

Location: Jaipur (In-office)

Type: Full-time

 **About Cosmium AI** Cosmium AI is an early-stage startup founded by **IIT Delhi alumni**, building the next generation of conversational Speech AI products. We move fast, ship often, and value extreme ownership. We are looking for a builder who wants to architect systems, not just write tickets.

What You'll Do

- **Own the Stack:** Build and maintain our Django/DRF backend, React web dashboard, and React Native mobile apps.
- **Ship AI:** Integrate real-time Speech AI and ML models into consumer-facing products.
- **Architect:** Design scalable REST APIs and clean PostgreSQL schemas.
- **Build Culture:** Work directly with founders to define the engineering roadmap and coding standards.

Must-Haves

- **Python Master:** Deep familiarity with Django & DRF.
- **Frontend Pro:** Solid React.js experience (Redux/Zustand).
- **Mobile Ready:** Experience with **React Native** (or a strong willingness to learn it fast).
- **Database Skills:** Comfortable with PostgreSQL and complex queries.

Bonus Points

- **1-2 Years Experience:** Proven history of shipping full-stack applications.
- Experience with WebSockets/Real-time communication.
- Deployment knowledge (Docker, AWS/GCP, CI/CD).

Why Join?

- **Founding Team:** Be one of the first hires with high autonomy.
- **Competitive Compensation:** Competitive salary and generous equity options
- **Hard Problems:** Work on cutting-edge Voice/Audio AI, not just CRUD apps.
- **Mentorship:** Work alongside experienced builders from top-tier institutes.

 **How to Apply** Fill the Google form at <https://forms.gle/MCxq2jxapjrrf4GC8>
